

UltraBREAK

The New Standard in Breaking Bundles

New **Up-Break Geometry** allows a smaller footprint and greater bundle throughput.

Faster Cycle Times are a result of improved controls with optimized position sensing to reduce overall platen travel during the break cycle.

UltraBREAK

The New Standard in Breaking Bundles

Color Touchscreen

User friendly interface is more intuitive and reduces set-up time.

Powered Tilting Conveyor

Provides quick and easy personnel access to the other side of the line.

Up-Break Machine Motion has been specially optimized to reduce platen travel during the break cycle, resulting in faster cycle times. The Up-Break motion also allows unrestricted maximum bundle size after breaking.

Smooth plastic conveyor surface for added bundle control.

Segmented Floating Platen

Patented design allows true multiple-across breaking performance for bundles with slightly unequal heights.
